ALGAECIDE

Algaecide 10

For Algae control in pools

Controls Algae and Slime in pools

Algae, while not harmful to bathers, do not belong in a properly operated swimming pool. If allowed to grow freely, the pool quickly becomes unusable. A pool can contain millions of algae cells before they become visible. Algae can make your pool water cloudy, clog filters, create objectionable odors, increase chlorine demand and reduce effectiveness of other pool chemicals. Continuous chlorination and periodic shock treatments help to a certain extent, but are not completely effective in destroying algae. Using a good algaecide as part of regular pool maintenance is the best way to control these microscopic plants. **Algaecide 10** is an algaecide consisting of a special fraction of quaternary ammonium compounds that effectively controls algae and algal slime growth in pools.

BENEFITS

- **Broad range** – Effective on most free-floating algae and algae that cling to the walls and bottoms of pools.
- **Non-metallic** – This product does not stain pool surfaces or swimmers' hair.
- **Compatible with all sanitizers** – Is compatible with most chemicals commonly used to treat pool water.
- **Preventative & cure** – Prevents algal growth and eliminates existing algae in pools.
- **Economical** – Adding one quart of product to 12,500 gallons of pool water controls algal growth.

DIRECTIONS FOR USE

INITIAL DOSAGE:

- To a clean pool, add 1 quart of this product per 12,500 gallons of water or ratio thereof. If algae growth is visible reapply the initial dose.
- Vacuum pool after 24 hours to remove dead algae.
- If algae are still visible, repeat dose as necessary until pool is free of visible algae.

MAINTENANCE DOSAGE:

- Add 8 ounces of this product per 12,500 gallons of water every 3-5 days or as needed to maintain 2 ppm active. Quaternary Test Kits are available for this use.

BOOSTER APPLICATION:

- Add 8 ounces of Algaecide 10 per 12,500 gallons of water after heavy or prolonged rainfall or after a heavy bathing load. The above directions should be followed even when the pool is not in use.

NOTE: For maximum efficiency, pool walls and bottom should be brushed regularly.

AVAILABILITY: Algaecide 10 is available in 1 gallon jugs.
